

Dear FCC:

I would like to comment about Verizon Wireless's proposed acquisition of UniceL. As a current customer of UniceL and Verizon I find this to be a huge injustice for us "little" people. I am a customer of both services because I can not afford to pay for Verizon and but my parents, other family and friends can not afford for me to not have Verizon. therefore my mother pays for me to have a Verizon cell phone on her plan. good thing that Verizon offers is their Mobile to Mobile service, other then that they are too expensive for the service they provide.

The only

Now, I would like to share a little information with you regarding my rational. I was a single mother who worked three jobs, attended college full-time and raised a son (so far) on my own. I obtained my Bachelor's Degree to find out that things would not be much different for me or my son; now I am would be considered one of those in the the failing or dwindling 'middle class'. I went to college to have more for myself but more importantly for my son and I graduated with more debt then I know what to do with at this time. You may ask, "Why is she telling us this?" My reason for sharing this is to hopefully enlighten you on what SO MANY of us in this region and all across the United States are enduring. Now, I would suggest that you and people in higher positions just don't care about us and that they only care about the money they can make through this acquisition. Yes, I have accepted that most likely I am right about this, but I would challenge anyone within this group that I am referring... step up and challenge my opinion of you. Show me why I should not think of you like this. Because, honestly if you cared about those of us struggling out here rather then just look down and laugh at us then please do not allow this acquisition to take place.

We need an affordable service in this area. If I did not have so much debt and if I could pay all the debt I accumulated with the different phone providers (land line) I would do that and go from there; but I do not have that option. There are so many others who are in the same place as I am. We have so much debt that it is hard to see the light; so I beg you to please do not harm these people any more then the economy has already done on its own.

We are in desperate need of someone with a good heart to take the podium away from the businessmen who just don't care! Whoever may read this I must ask, "Are you that one who will help us?"

Sincerely,  
Desiree Clark
